

Tips tricks

Connect drawers with the Cabineo

Did you know that the Cabineo is ideal for constructing drawers? This application is made possible by the flush milling of the connector and corresponding cover cap, on single or double depth of drawers.

How it works:

Download the CAD data for CNC machining from www.lamello.com

Machining the workpiece, including milling the contour for the cover cap

Position connector and tap into place

Connect drawer sides with front

Secure drawer double

Connect drawer sides with front piece

Finished!

Insert the drawer

One-man furniture assembly with Cabineo

1. Fast assembly thanks to single-piece connector

2. Start furniture assembly directly on the base

3. Place furniture side on base. The element is correctly positioned by the protruding screw

4. Join furniture elements with cordless screwdriver and Cabineo tool. Easy, fast working with preset torque about 2.5 Nm

5. Insert rear panel into groove. After screwing in place, the side is very stable due to the high clamping force

6. Position cover and push towards the furniture side

7. Screw front corner in place with a cordless screwdriver. This makes one-man assembly easy

8. Join the furniture and subsequently fit the fixed intermediate shelves

9. After assembly, fasten the fixed intermediate shelves in the required positions

10. Tip:
- Place one side of the shelf on the shelf support and fasten the other side
- Screws tightened flush facilitate installation

11. If required, use cover caps on the Cabineo

12. For the complete video, go to www.lamello.com
